**DETAILED ACTION**  
***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-13 and 25 drawn to a method for patterning a polymer film wherein a polymer film is applied to a surface, then a stamp is applied to a polymer film and upon removal of the stamp, portions of the polymer film are removed with the stamp.

Group II, claims 14-24, drawn to a method of applying a patterned polymer film onto a surface wherein a polymer film is applied to a stamp and then portions of the polymer film are transferred from the stamp to the surface.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons, as stated by the international searching authority: The "special technical features" in each group of claims areas a whole, different from each other. Therefore, these groups of inventions are not so linked together as to form a single inventive concept with regard to PCT Rule 13. A telephone call was made to Jonathan Scherer on September 1, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
